

SI2. Participants

Chiara Santolin* Gonzalo García-Castro Martin Zettersten
Nuria Sebastian-Galles Jenny R. Saffran

Updated: January 17th, 2020

Participants

We retrieved data from 102 participants: 40 from Saffran & Wilson (2003) (tested in Wisconsin), 12 from (???) (tested in Wisconsin), 26 from Santolin & Saffran (2019) (tested in Wisconsin), and 24 from the replication study (???); tested in Barcelona). Two datapoints were available for each participant: one for the mean looking time in “familiar” trials, and one for the mean looking time in “novel” trials. A total of 204 datapoints were included in the analysis. Participants included in our analysis were those included in the final version of both studies.
